- Racing Junior Pro

organic trace elements!

# RACING

SYNICODE

embedding expertise.

# Racing Peacemaker

A pelleted complete feed for all horses

- High energy, no oats
- A balanced choice also for sport horses and hard training
- A homogenous, hygienic, palatable complete feed with no dust!
- Contains sufficient amounts of minerals, trace elements and vitamins. No additional mineral feed is needed.
- Lin seed meal and Progut for the well being of stomach and intestine
- Composition: barley, wheat bran, sugar beet pulp, lucerne meal, vegetable oil, lin seed meal, minerals, trace elements, vitamins.

**RACING**

SYNICODE

Embedding expertise.

# Racing Prix

## A pelleted complete feed for all horses

- Especially good alternative to replace oats + minerals
- Effective balanced ration also for hard training.
- A homogenous, hygienic, palatable complete feed with no dust!
- Contains a lot of oats and sufficient amounts of minerals, trace elements and vitamins. No additional mineral feed is needed.
- Progut to take care of the welfare of the gastro-intestinal tract
- High quality amino acids from potato protein
- Composition: Oats, sugar beet pulp, wheat bran, grass meal, oat hull meal, barley, wheat, molasses, linseed meal, potato protein, Progut, vegetable oil, minerals, trace element, vitamins.

**RACING**

SYNICODE  
Embedding expertise.

# Racing Regular

A pelleted complete feed for all horses

- A quality feed at economy price
- Rich in fiber and a low energy content: a good choice for hobby horses and ponies
- A cost effective choice to replace both oats and mineral feed in the feeding
- A homogenous, hygienic, palatable complete feed with no dust!
- Contains sufficient amounts of minerals, trace elements and vitamins. No additional mineral feed is needed.
- High quality amino acids from potato protein
- Composition: Oat hull meal, barley, sugar beet pulp, oats, wheat bran, molasses, potato protein, minerals, trace elements, vitamins, biotin.

**RACING**

SYNICODE

Embedding expertise.

# Racing Selected

A low starch complete feed for all horses

- A very low starch (5%) and sugar content (5%)
- Recommended for horses with carbohydrate related muscle problems (PSSM, ERS) , ulcer, laminitis and equine metabolic syndrome (EMS)
- A balanced choice also for sport horses and hard training
- A homogenous, hygienic, palatable complete feed with no dust!
- Contains sufficient amounts of minerals, trace elements and vitamins. No additional mineral feed is needed.
- Composition: Lucerne meal, sugar beet pulp, wheat bran, barley, vegetable oil, molasses, lin seed expeller, minerals, trace elements, vitamins

**RACING**

SYNICODE

Embedding expertise.

# Racing Selected

For horses suffering EGUS

To prevent gut ulceration:

- Low amount of starch in feeding
- High amounts of lucerne -> Selected contains also roughage
- Natural feed source for horses

**RACING**

SYNICODE

Embedding expertise.

# Racing Smart

A pelleted complete feed especially for ponies and hobby horses

- A complete feed with lower dosage value for ponies and horses with good feed conversation capacity
- Contains high amounts of digestible fibers
- Low amount of starch (14 %)
- A homogenous, hygienic, palatable complete feed with no dust!
- Racing Smart is a very good alternative for hobby horses or horses doing light work.
- Composition: barley, sugar beet pulp, wheat bran, grass meal, molasses, vegetable oil, minerals, trace element and vitamin premix

**RACING**

SYNICODE

Embedding expertise.

# Racing Senior

For senior horses (15 + years)

- Senior horses often have impaired feed utilization and dental problems make eating more difficult. Therefore, a feed with a good digestibility is needed.
- Racing Senior contains high-quality, carefully selected and highly digestible raw materials, oat-free complete feed.
- ExcellenT technology -> high digestibility and absorption of nutrients.
- Contains also patented Progut to support intestinal microbial balance and nutrient absorption as well as immunity.
- High quality protein / amino acids from potato protein
- Composition: Barley, wheat, sugar beet pulp, wheat bran, lucerne meal, molasses, lin seed meal, potato protein, lysine, Progut, minerals trace elements, vitamins.

**RACING**

SYNICODE

Embedding expertise.

# Racing Trophy

A pelleted complete feed for horses in intensive training

- High energy value 14 MJ/kg DM
- High fat content 10 %, high quality rice bran
- For horses with high energy need (intensive training)
- Suitable also for lactating mares + Racing Protein
- High vitamin E content 600 mg/kg, Progut + high quality amino acids form potato protein
- Composition: Barley, wheat, oats, sugar beet pulp, rice bran, linseed expeller, vegetable oil, molasses, fructose, potato protein, Progut, minerals, trace element, vitamins.

**RACING**

SYNICODE

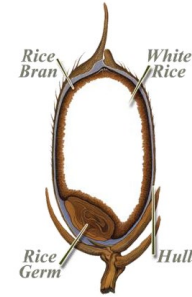

Embedding expertise.

# Racing Trophy

A pelleted complete feed for horses in intensive training

Rice bran:

- Rich in natural trace elements eg. for the well-being of the hoofs, skin and coat, contributing to hair change and healthy shine.
- Rice bran contains e.g. natural B vitamins and natural vitamin E (not included in label values)
- Powerful antioxidants (gamma oryzanol) -> muscles, recovery, resistance, appetite

# Racing Trophy

A pelleted complete feed for horses in intensive training

Rice bran:

- Stabilized rice bran has a low glycemic index (GI), which allows it to release energy without slowly heating the horse. -> positive impact on health and performance in addition to good nutritional properties.
- Studies have shown that rice bran reduced the risk of bone chips(DOD), laminitis, cough and stomach ulcers and reduced digestive tract disorders.
- Helps in muscle recovery after a competitive performance

**RACING**

SYNICODE

Ernährungsexpertise

# Racing Junior Pro

A pelleted feed for foals

- Contains nutrients for balanced growth
- High protein and lysine content
- High mineral content to ensure enough building blocks for bones
- High vitamin content, especially vitamin D<sub>3</sub>
- A low starch stomach friendly choice
- Contains also patented hydrolyzed yeast product **Progut**® to support the microbial balance in the hind gut and to support feed digestion and immune system.
- Composition: oats, sugar beet pulp, lucerne meal, soy bean meal (non-GMO European origin), wheat bran, molasses, vegetable oil, Progut, minerals, trace elements, vitamins.

**RACING**

SYNICODE

Embedding expertise.

# Racing Junior Pro

A pelleted feed for foals

- Both the requirement for absolute protein and the need for high quality protein are higher for growing horses than for other horses.
- Young horses generally have a smaller feed intake than adult animals. As a consequence, the concentration of digestible crude protein must be higher in the diets of young growing horses than of any other category.

**RACING**

SYNICODE

Embedding expertise.

## Racing complete feeds – Nutrients\*

	Prix	Peace-maker	Regular	Selected	Senior	Smart	Trophy	Junior Pro
Crude protein, %	12,1	12,5	11,7	15	13,4	11,9	12,5	<b>16,5</b>
Crude fat, %	5,6	6,5	4,5	8,7	5,2	5,5	10	5,3

\* There might be some variation in the nutrient values, because all the raw materials all analyzed and label values will be adapted to correspond actual analysis

# Patented hydrolyzed yeast Progut

## **Nucleotides:**

- Enhances immunity
- Improves the development of intestinal mucosa
- Improves the growth of bifidobacteria and lactobacillus

## **Betaglucanes:**

- Enhances in immunity

## **Mannoproteines:**

- to prevent the adhesion of Salmonella in the gut wall

# Patented hydrolyzed yeast Progut

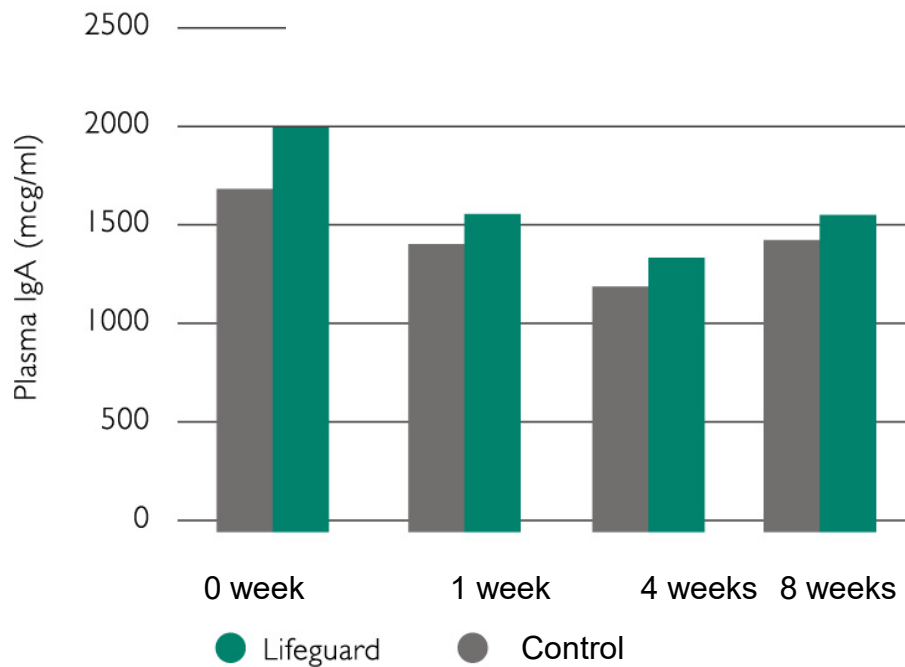

- Research 2005-2006, MTT/Danisco:
- Higher amount of immunoglobulins in colostrum (IgA)
- Prevents the adhesion of harmful bacteria in the intestinal wall
- Higher amount of red blood cells in the blood of new born foals
- Better growth of foals during first 4 months of life

**RACING**

# Racing complete feeds

- Muesli products:
- Racing Perfect Mix – chelated trace elements and organic selenium
- Racing Builder Mix – with extra protein

**RACING**

SYNICODE  
embedding expertise.

# Racing Perfect Mix

A muesli complete feed for all horses

- Tasty muesli feed
- Chelated manganese, zinc and copper
- Organic selenium
- Medium energy level 11 MJ/kg DM
- Lower content in protein (crude protein 8,7 %)
- Contains sufficient amounts of minerals, trace elements and vitamins. No additional mineral feed is needed.
- Composition: Barley flakes, oat hull meal, maize, sugar beet pulp, wheat bran, sugar beet pulp, lucerne pellets, barley meal, carrot flakes, molasses, sodium chloride, rape seed oil, dextrose, minerals, trace element, vitamins.

**RACING**

SYNICODE

Embedding expertise.

# Racing Builder Mix

A muesli complete feed with high protein content

- Racing Builder Mix is produced for horses who need extra protein (e.g. sport horses to build up muscles, young horses in training).
- Steam cooked raw materials which are easily absorbed
- High energy content
- Suitable also for lactating mares and young horses.
- Easy to use and offers the horse a balanced ration
- Composition: Steam cooked barley, barley, sugar beet pulp, wheat bran, steam cooked maize, steam cooked wheat, linseed meal, molasses, lucerne pellets, carrot, vegetable oil, minerals, trace element and vitamin premix

**RACING**

SYNICODE

- Racing Speedpower
- Racing Mash
- Racing Greenline
- Racing Energoil

**RACING**

SYN-CODE  
Embedding expertise.

# Racing Progress

## Ration balancer pellets for horses and ponies

- Low starch content (12 %) and low sugar content (7,5 %) and digestible fibres make the product very stomach friendly.
- Decreases starch load in the gut.
- Progress is used 50:50 with oats or other cereal grains. Suitable for hobby horses as such, for sports horses with cereals.
- Contains all required minerals, trace elements and vitamins
- Composition: Sugar beet pulp, barley, wheat bran, lucerne meal, potato protein, molasses, vegetable oil, minerals, trace-element and vitamin premix.

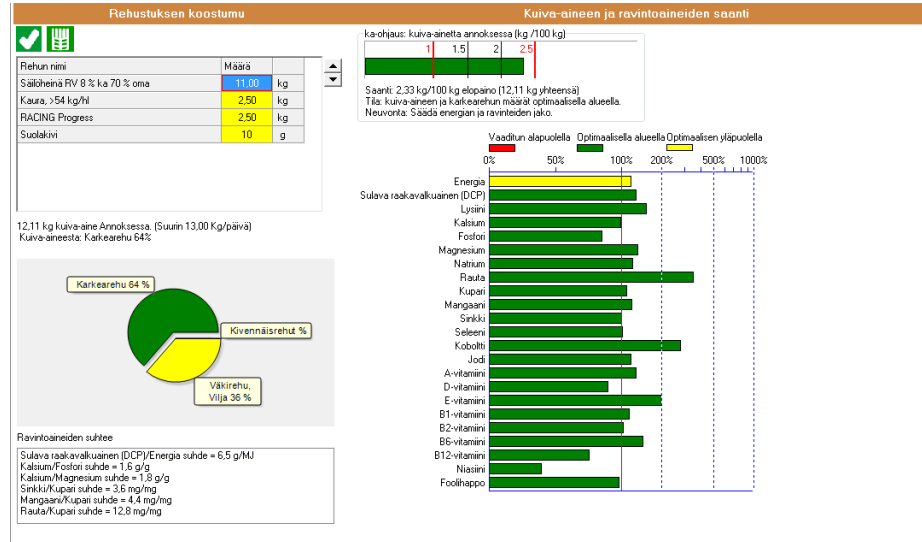

**RACING**

SYNICODE

Embedding expertise.

# Racing Progress

Horse in intensive training

# Racing Speedpower

## Ration balancer pellets for sporthorses

- A modern ration balancer for extra speed and power!
- The product contains a large amount of digestible fibre.
- 10 % fat to give lots of energy to enhance sport performance.
- Decreases starch load in the gut, starch content only 18 %.
- Contains a patented hydrolyzed yeast product (**Progut®**) which stabilises microbial balance in the hind gut and stimulates immunity.
- Composition: Sugar beet pulp, wheat bran, barley, vegetable oil, oat hull meals, wheat, lucerne meal, hydrolyzed yeast **Progut®**, minerals, trace element and vitamin premix.

**RACING**

SYNICODE  
Embedding expertise.

# Racing Protein

## Protein balancer pellets

- Racing Protein has high protein content (30 % crude protein) with high amounts of essential amino acids.
- Lysine is the limiting amino acid in horse feeding and Racing Protein offers the horse 50 g/kg pure lysine. Racing Protein satisfies all the protein and lysine requirements of growing foals and lactating mares.
- Composition: Rapeseed meal, sugar beet pulp, potato protein, linseed meal, amino acids, molasses, broad bean, vegetable oil, salt, Progut hydrolyzed yeast.

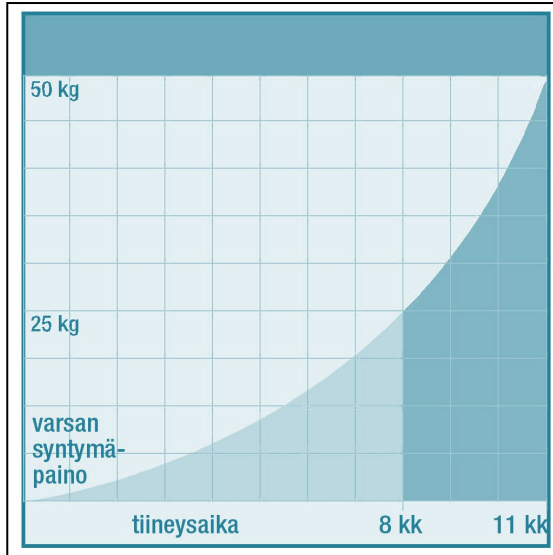

**RACING**

SYNICODE

Embedding expertise.

# Racing Protein

## Protein balancer pellets

- A fetus is growing very fast during the last months of pregnancy

### 7<sup>th</sup> month of pregnancy

A fetus has about 20 % of the birth weight

### 10<sup>th</sup> months of pregnancy

A fetus has about 70 % of the birth weight

**RACING**

SYNICODE

Embedding expertise.

# Racing Protein

## Protein balancer pellets

### Lactating mares:

- High protein need: 1- 2 litres of Racing Protein depending on the protein content in hay/haylage
- High quality pasture is also a good source of protein and amount of Racing Protein can be reduced
- The composition of the milk is not greatly affected by diet composition, but milk production (kg/d) depends on both protein and energy intake.

**RACING**

SYNICODE

Embedding expertise.

# Racing EasyPro

## Protein balancer pellets

- Racing Easy Pro is an amino acid–optimized, rapeseed-based protein feed for horses.
- Especially well suited for foals and growing horses, broodmares, and horses in training.
- The product contains rapeseed complemented by high-quality potato protein.
- Potato protein is one of the best available protein sources based on its amino acid profile.
- Palatability is enhanced with protein-rich dried grass meal
- Easy Pro is supplemented with lysine—an essential amino acid for horses
- The formulation is also suitable for many horses with sensitivities or allergies, as it contains no cereals, alfalfa, soy, or yeast.
- Ingredients: Rapeseed meal, grass meal, molasses, vegetable oil, premixes, amino acids, potato protein.

**RACING**

15.4.2026

SYNICODE  
Embedding expertise.

# Racing Mash

## Complementary feed for all horses

- A palatable quality product with high amounts easily digestible fibre
- Can be used to replace oats/barley in the feeding to create a versatile feed portion
- Low starch and low sugar content
- Rich in easily digestible fibre
- Ensures water intake when mash is given soaked in the water
- Composition: wheat bran, sugar beet pulp, molasses, lin seed meal, salt, vegetable oil

**RACING**

SYNICODE  
Embedding expertise.

# Racing Greenline

## High quality lucerne pellets

- Racing Greenline contains lucerne pellets which can be used as an extra roughage source in case hay has a low nutritional value.
- Easy to use and has higher amount of nutrients compared to grass hay.
- Provides a good buffering effect in horse's stomach. Lucerne pellets are recommended especially for horses suffering from ulcers.
- Racing Greenline has also high protein content. Protein is needed for developing muscle mass which makes Racing Greenline pellets a very good feed source especially for sport horses. Also contains a large amount of digestible fibre to help the horse's digestive tract.
- Pelleted lucerne meal is suitable also for foals
- Doping-tested!

**RACING**

SYNICODE

Embedding expertise.

# Lucerne vs hay pellets

- Lucerne – more protein
- Lucerne - more calcium
- Lucerne – Calcium ja protein: buffering effect in stomach

	DM	Crude protein %	Dig CP %	Lysine g/kg ka	Ca g/kg ka	P g/kg ka
Lucerne hay	88	15-19	10,8 - 14,6	7	19	2,7
Hay	86	8-12	7,7 - 5,1	5,52 - 3,68	2,5 – 3	2,5
Young pasture grass	20	18	13,5	8,2	3,8	3,5

# Racing Energoil

## Cold pressed rape seed oil

- Racing Energoil is used to increase energy content of the daily feed ration and maintain performance and muscle condition.
- Contains about 3 times higher energy value than cereals
  - > an ideal energy source for race horses with high energy demands.
- A starch/sugar free energy source for horses suffering stomach/muscle problems.
- The fatty acid composition in cold pressed rape seed oil is also valuable for horses (skin and hair condition, joints).

**RACING**

SYNICODE

Embedding expertise.

# Racing minerals and lick stones

- Racing Mineral Plus
- Racing Mineral
- Racing Mineral P Balance
- Racing Mineral P HayPlus
- Racing Equimineral Bowl
- Racing Rocky

**RACING**

SYNICODE  
Embedding expertise.

# Racing Mineral Plus

## Palatable, pelleted mineral feed

- High quality raw materials like sugar beet pulp, molasses and wheat bran makes Mineral Plus very palatable.
- Calcium:phosphorus ratio 4,5:1 is optimal to supplement oat + hay based diets. Racing Mineral Plus contains also all trace elements and vitamins.
- A balanced composition
- Dosage: 300-350 g/day/horse

**RACING**

SYNICODE

Embedding expertise.

# Racing Mineral Plus

## Palatable, pelleted mineral feed

- For resting horses or in a very light work in good body condition:
  - Only hay + Mineral Plus
- For horses in work:
  - Hay + oats + Mineral Plus
- For horses having only a low dosage of complete feeds:
  - Hay + complete feed (lower dosage than recommended) + Mineral Plus (lower dosage)

**RACING**

SYNICODE  
Embedding expertise.

# Racing Mineral

A mineral feed for all horses - granules

- Racing Mineral is produced by a patented “muro” process (granules). Muro products are small dust free granules which are easy to dose.
- The calcium:phosphorus ration in Racing Mineral is 4:1, which optimizes the calcium/phosphorus ration in oat/hay based diets
- Organic all trace elements and vitamins.
- Dosage: 100-200 g /day/horse

**RACING**

SYNICODE

Embedding expertise.

# Racing Mineral P Sensi-Balance

## Mineral feed with low Ca:P ration

- Racing Mineral P Sensi-Balance is an apple pomace containing mineral feed in powder.
- The calcium:phosphorus ration is 1,6:1, which optimizes the calcium/phosphorus ration in hay based diets.
- Perfect for hobby horses in light work
- A good mineral supply also when complete feed are used below recommendations
- Contains also sea weed and diatomaceous earth
- Organic trace elements and vitamins.
- Dosage: 70 - 110 g /day/horse, ponies 30 – 70 g/day

**RACING**

SYNICODE

Embedding expertise.

# Racing Equimineral Bowl

A mineral lick stone for all horses

- Racing Equimineral Bowl is an excellent and palatable salt lick for pasture or paddock use.
- Thanks to its balanced composition, it can also be used as the sole source of minerals and trace elements. The calcium-to-phosphorus ratio is kept moderate (2.9:1), making the product best suited to complement the diet of adult horses fed mainly on forage.
- Racing Equimineral is also supplemented with vitamins A, D, and E, which are essential for every horse.

**RACING**

SYNICODE  
Embedding expertise.

# Racing Rocky

## A lick stone for all horses and ponies

- Racing Rocky is a salt lick stone (sodium 380 g/kg)
- An additional source of trace elements, magnesium, vitamin E and biotin
- Racing Rocky is an excellent source of salt
- Horses can have free access to Racing Rocky.

**RACING**

SYNICODE  
Embedding expertise.

# Racing vitamins

- Racing ADEK Vimin
- Racing BE Vimin
- Racing B-Vimin Boost
- Racing Action Vimin
- Racing ADE-Vimin Oil
- Racing Natural E
- Racing C-100 Vimin

**RACING**

SYNICODE  
Embedding expertise.

# Racing ADEK Vimin

## A pelleted vitamin

- A palatable pelleted vitamin product
- Easy to use
- Vitamins A, D, E and K
- Selenium
- Biotin

**RACING**

SYNICODE  
Embedding expertise.

# Racing BE Vimin

## A liquid vitamin product

- High in vitamin E and vitamins B<sub>1</sub>, B<sub>2</sub>, B<sub>6</sub> and B<sub>12</sub>. Contains also biotin and niacin.
- Horses in heavy training and during stressful situations need almost double dose of vitamins in group B.
- In the case of a disturbed microbial balance in the hind gut microbial vitamin synthesis is also decreased -> increases the need of vitamins in B group.
- Vitamin E is an important antioxidant supporting muscle metabolism.
- Recommended to use especially with sport horses and horses in stressful situations

**RACING**

SYNICODE  
Embedding expertise.

# Racing Action Vimin

## A liquid multivitamin product

- Fat soluble vitamins A, D, E and K
- Water soluble vitamins in group B: vitamins B<sub>1</sub>, B<sub>2</sub>, B<sub>6</sub> and B<sub>12</sub>, biotin, pantothenic acid and niacin.
- Racing Action Vimin also contains xylitol, which increases vitamin absorption
- For all horses during the indoor feeding season, especially when there is a decreased vitamin content in the forage
- Breeding mares, foals and sport horses need high amounts of vitamins in their diet.

**RACING**

SYNICODE  
Embedding expertise.

# Racing ADE-Vimin Oil

- An oil based product containing vitamin A-, D-and E-
- To balance vitamin intake
- Vitamin D3 is needed especially for the absorption of calcium and immune system
- Especially for winter season, foals, horses with covered blankets, for horses suffering summer itch
- A low dosage
- An easy to use package

**RACING**

SYNICODE  
Embedding expertise.

# Racing Natural-E

## An oil based product with natural vitamin E

- Contains natural vitamin E with an effective bioavailability (RRR-alpha-tocopheryl acetate)
- Especially for sport horses, breeding mares and stallions, horses with muscle problems
- A low dosage
- An easy to use package
- 200ml and 1000 ml packages

**RACING**

SYNICODE  
Embedding expertise.

# Racing C-100 Vimin

## Vitamin C powder

- 99 % L-ascorbic acid with vitamin C concentration 985 000 mg/kg.
- Vitamin C has a positive effect on iron absorption, vitamin E metabolism, joints and the immune system.
- Racing C-100 Vimin can be used for all horses.

**RACING**

SYNICODE  
Embedding expertise.

# Racing complementary feeds

- Racing HepoLac
- Racing Lifeguard
- Racing Electrolyte / Racing Recovery
- Racing Biotin
- Racing Red Iron
- Racing MSM
- Racing Joint Control HA
- Racing Garlic
- Racing Psyllium

**RACING**

SYNICODE  
Embedding expertise.

# Racing HepoLac

## Tasty pelleted product to support gastro-intestinal tract

- Patented Progut® to support microbial balance in the gastro-intestinal tract / hindgut, absorption of the nutrients and immunity.
- Thermostabilized lactic acid bacteria Acidophilus Lactobacillus (Zoolac®)
- Zoolac® is registered as a feed material and is a documented lactic acid bacteria strain allowed for horses also
- Lin seed expeller to support the intestinal motion
- Composition: Lin seed meal, sugar beet pulp, ZooLac-vinasse, molasses, lucerne meal, Progut, carrot flakes

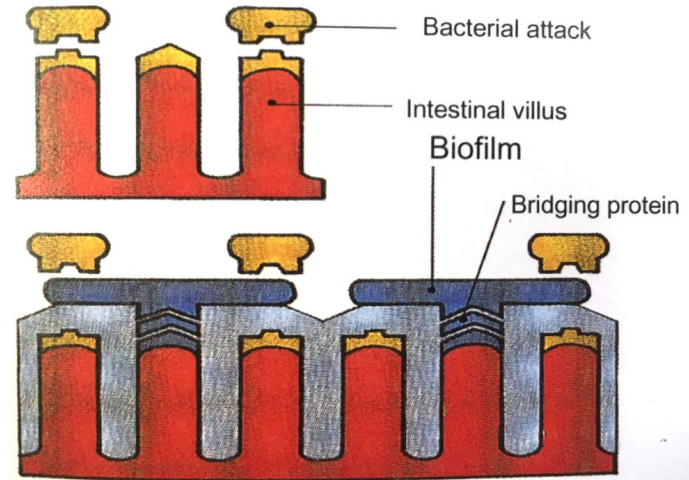

**RACING**

SYNICODE  
Embedding expertise.

# Racing HepoLac

## Tasty pelleted product to support gastro-intestinal tract

- Mechanism for ZooLac®:
- Adheres to the intestinal surface and forms a physical barrier
- Prevents the attachment of harmful bacteria
- Stimulates the synthesis of beneficial bacteria

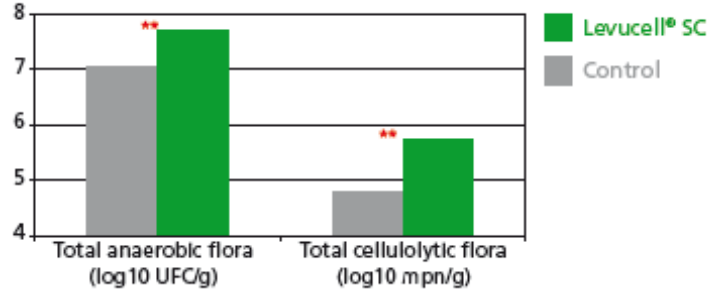

**RACING**

SYNICODE  
Embedding expertise.

# Racing LactoBac

A dietetic complementary feed to enhance digestibility

- Live yeast *Saccharomyces cerevisiae*:
- Better fiber degradability
- higher amount of total microbes
- higher amount of cellulolytic bacteria

**RACING**

SYNICODE  
Embedding expertise.

# Racing Lifeguard

## For broodmares and small foals

- A premium product with patented hydrolyzed yeast Progut®
- To support vitality of the foal and fertility of the mare
- To support immune system, microbial balance in hind gut and ensure good quality of colostrum
- Important vitamins: folic acid, vitamin E, vitamin D3, vitamin K and vitamin B6
- In the late pregnancy and during lactation
- For young foals

**RACING**

SYNICODE  
Embedding expertise.

# Racing electrolytes

- A powder product: Racing Electrolyte
- A liquid product: Racing Recovery
- The most important electrolyte salts in the correct relations to replace the salts lost in the sweat
- For high sweating situations
- To ensure water intake

**RACING**

SYNICODE  
Embedding expertise.

# Racing Biotin

## A biotin supplement in powder form

- Biotin is an essential nutrient for good quality hooves and healthy skin
- Racing Biotin contains also organic zinc and copper, calcium and methionine to support the growth of hoofs and skin condition
- Glucose as carrier makes the product very palatable for horses.

**RACING**

SYNICODE

Embedding expertise.

# Racing MSM

100 % methyl sulphonyl methane (MSM)

- 100 % MSM
- To support muscles and joints

**RACING**

SYNICODE  
Embedding expertise.

# Racing Joint Control HA

## to support joint function

- A premium product with chondroitine sulphate, glucosamine sulphate and sodium hyaluronate
- Also added methionine, manganese and vitamin C
- Recommended for horses with joint problems, sport horses and old horses

**RACING**

SYNICODE  
Embedding expertise.

# Racing Garlic

## A high quality natural garlic

- Racing Garlic contains 100 % natural garlic powder.
- Garlic contains natural allicin with has an anti-inflammatory and antimicrobial effect supporting the immune system.
- Garlic has a positive effect on respiratory health.
- Racing Garlic contains no additives. It is a safe feed supplement for horses during periods of stress when immune response can be depressed.

**RACING**

SYNICODE  
Embedding expertise.

# Racing Psyllium

- A feed supplement to prevent sand accumulation into gastro-intestinal track
- Very effective powder
- Add psyllium always into a water
- Psyllium forms a thick slime to help sand removal
- Use in periods of 5 – 7 days

**RACING**

SYNICODE  
Embedding expertise.

**RACING**
